Remember Me [Forgot Password?](#)

LOGIN

[Create an account](#)

EN

1. Enter the details you entered when creating your new account and click 'Login'.
2. If you want the website to remember you, so that you don't have to login every time you access the site, check the 'Remember me' tick box.

Note: The first time you login you'll be directed to the main summary page. Aramex powered by Fastway and EIZ have a customised solution so there is no requirement to upgrade your package.

2

The screenshot shows the EIZ Freight dashboard interface. A system message overlay is displayed in the center, reading: "System message", "Welcome to EIZ Freight", "Dear Amanda Price,", "Welcome to EIZ.", "EIZ.com.au is an eco-system to provide affordable management technology to small and medium size companies. EIZ.com.au integrates with leading marketplaces, shopping-carts and transport companies, also provide online sellers Easy-Use Order and Freight Management System.", "Your current package is Starter, please use this link for more package details or you can upgrade your package there.", "Upgrade Your Package", "EIZ Team". The background dashboard includes a sidebar with navigation options like Dashboard, Orders, and Shipment. The main content area features a "MONTHLY CONSIGNMENT STATISTICS" chart and a "Marketplaces Rank" table.

Your myfastway account

Linking your myfastway account

1

The screenshot shows the MyFastway dashboard interface. At the top, there's a navigation bar with a 'Current Plan: Starter' dropdown and user information 'Amanda Price' and 'EN'. The main content area is divided into several sections:

- MONTHLY CONSIGNMENT STATISTICS:** A line chart showing 'Monthly Sales Volume' and 'Monthly Sales Amount' from 2019-01 to 2019-08. A tooltip for the 'Subscribe' button is visible over the 'aramex' logo.
- Order process status and sales summary:** Includes 'Today waiting Process orders' (1) and 'Today unshipped orders' (0).
- Sales summary:** A table showing sales for different periods.
- Marketplaces Rank:** A bubble chart showing 'Shopify APP' at 100%.
- How much did your customers spend during the last 31 days?:** A progress bar showing 'Total sales amount during the last 31 days'.

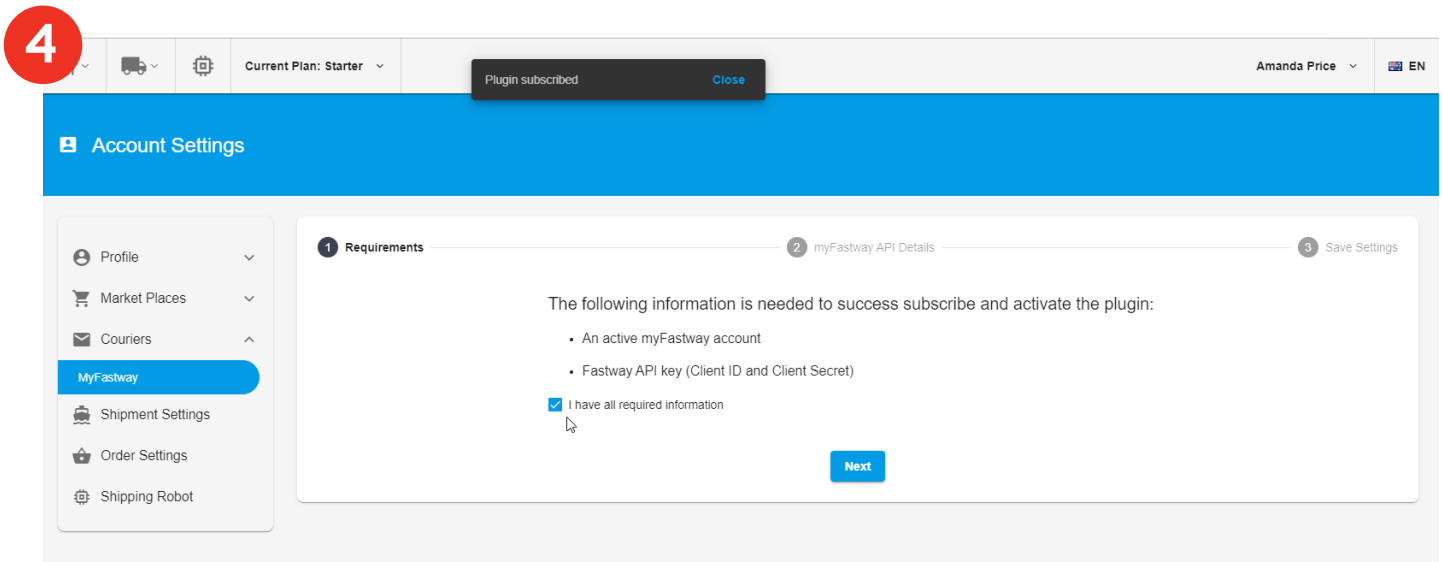

1. Login to the EIZ website and navigate to the delivery truck icon > click on myfastway
2. Click 'Install App'
3. Click 'Subscribe'

2

The screenshot shows the MyFastway app installation page. It features the MyFastway logo and the text 'MyFastway integration'. A prominent 'Free' offer is displayed, with 'was \$' crossed out. Below this, it states 'MyFastway is a free add-on' and provides an 'Install App' button.

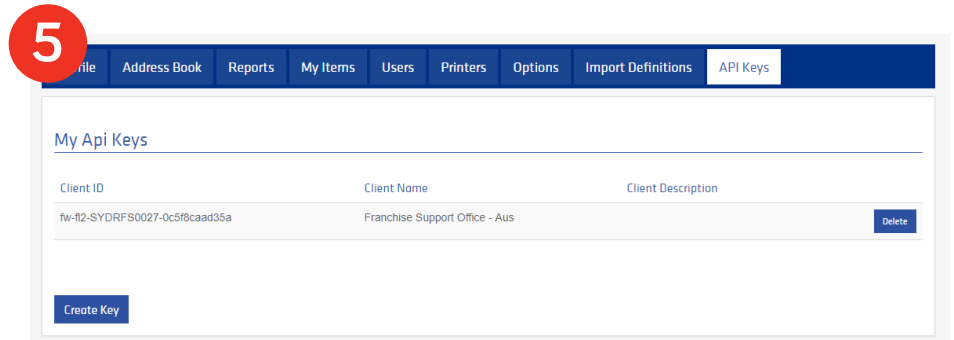

3

The screenshot shows a confirmation dialog for the MyFastway app. It has a blue header with the MyFastway logo and a close button. The dialog contains the text 'Price Free' and a 'Subscribe' button.

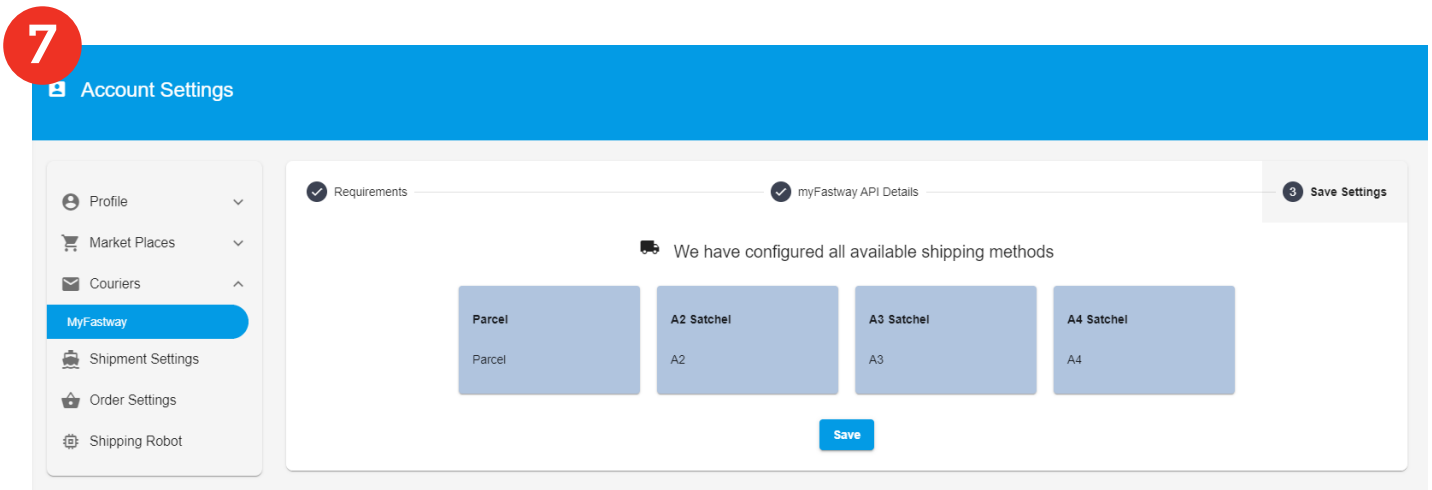

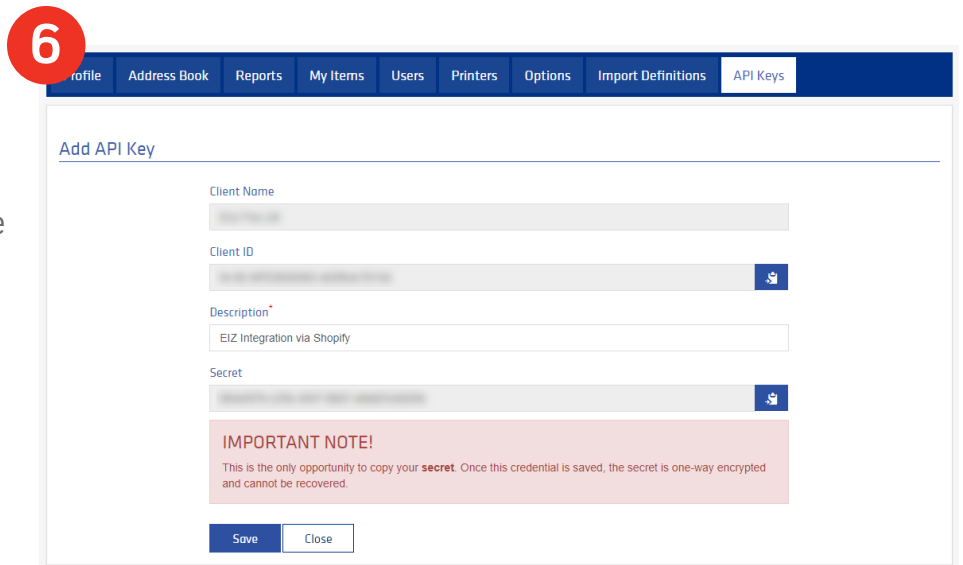

4. If you have your myfastway API client key and secret key available, click next and move to page X.

5. If not, navigate to myfastway.com.au > Administration > API Keys

6. Enter the ClientID and Secret key into the EIZ app and click okay.

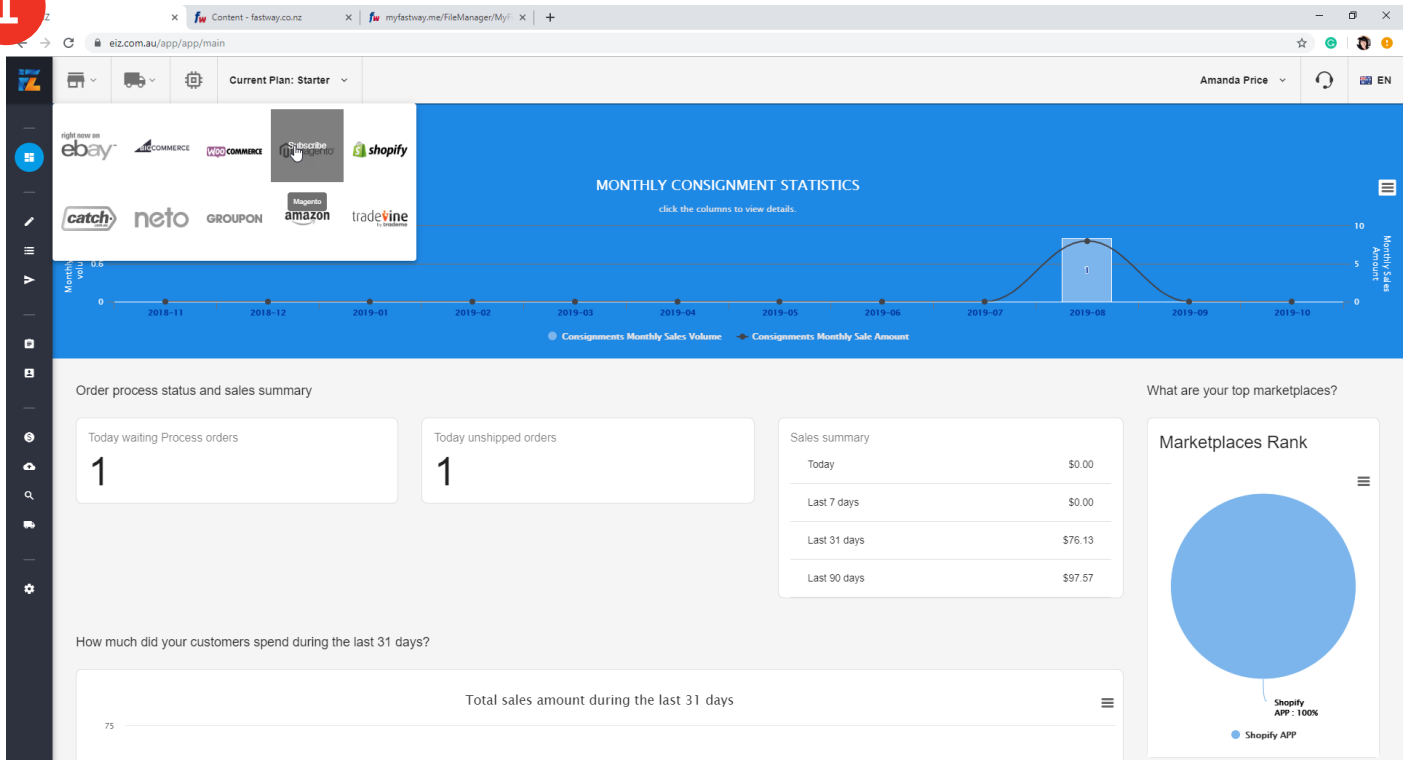

7. The app will display the shipping options available to your myfastway account as per the screenshot below, click 'Save'.

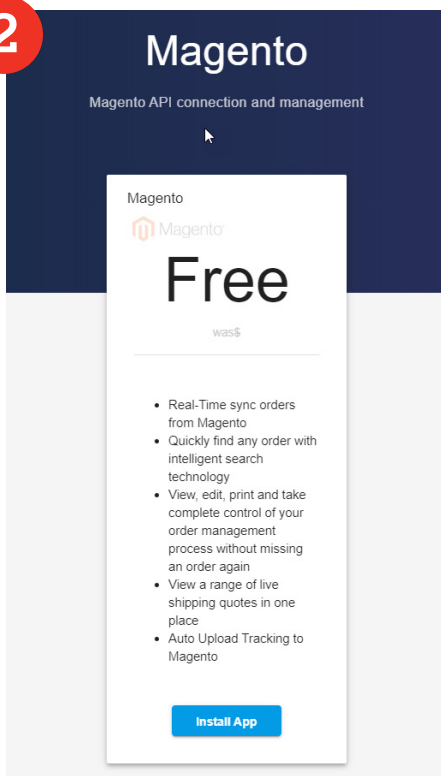

Magento

Linking your e-commerce platform

1

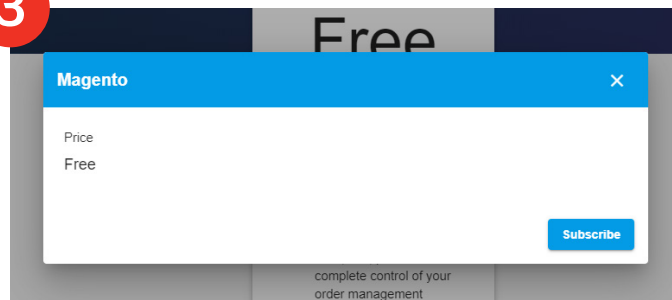

2

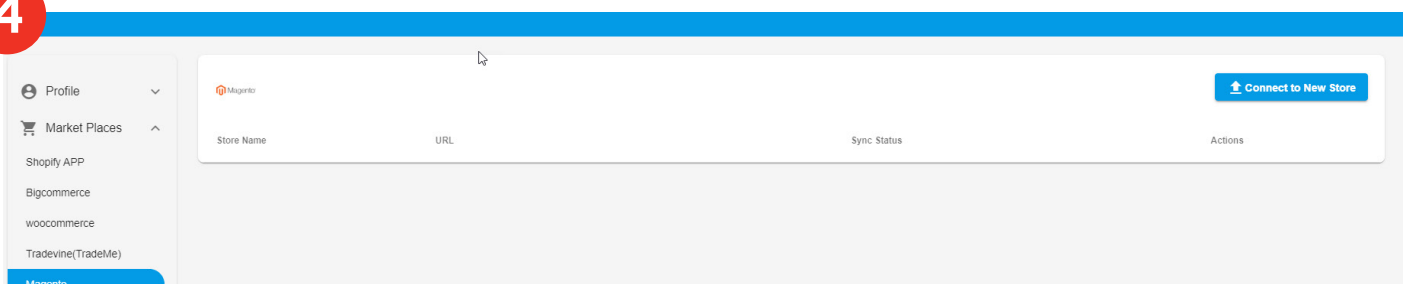

1. Navigate to the shop drop down icon as pictured (above)
2. Click on the Magento logo from the icons shown. A summary screen will display as shown (right) click on the 'Install APP' button.
3. Click on the 'Subscribe' button when the pop up appears
4. When the account settings screen is visible, click the 'Connect to New Store' if you don't have your shopify API key & password continue to the next step.

3

4

Connecting your API key

1. Login to your Magento Admin account and click 'System' > 'Extensions' > 'Integrations' to view the integration page.
2. Click 'Add New Integration', the system will bring up the 'New Integration' page.
3. Enter a unique name for the integration in the 'Name' field. Then enter your Magento admin password in the 'Your Password' field. Leave all other fields blank.
4. Click the 'API' tab. Select the Magento resources the integration can access - you can select all resources, or select a custom list.
5. Click 'Save' to save your changed and return to the Integrations page.
6. Click the 'Activate' link in the grid that corresponds to the newly-created integration.
7. Click 'Allow'. A dialog similar to the following will display.
8. Make note of the tokens as these are required for the integration with EIZ.
- 9.
10. Enter your information into the EIZ app and click 'Validate and Save'

Syncing transactions

Syncing Magento transactions to EIZ

1

The screenshot shows the 'Account Settings' page for a user named Amanda Price. On the left, there is a navigation menu with options: Profile, Market Places, Shipment Settings, Order Settings, and Shipping Robot. The 'Market Places' section is active. In the main content area, there is a table with columns: Store Name, URL, Sync Status, and Actions. A single row is visible for a Magento store with the status 'Not in Sync Orders'. A blue button labeled 'Connect to New Store' is in the top right corner. A dark notification banner at the top says 'Add Store Success. Got it.'

2

This screenshot is similar to the first one, but the 'Sync Status' for the Magento store is now 'Syncing Store Orders' with a green checkmark. The toggle switch in the 'Actions' column is turned on (blue). A red arrow points to this toggle switch.

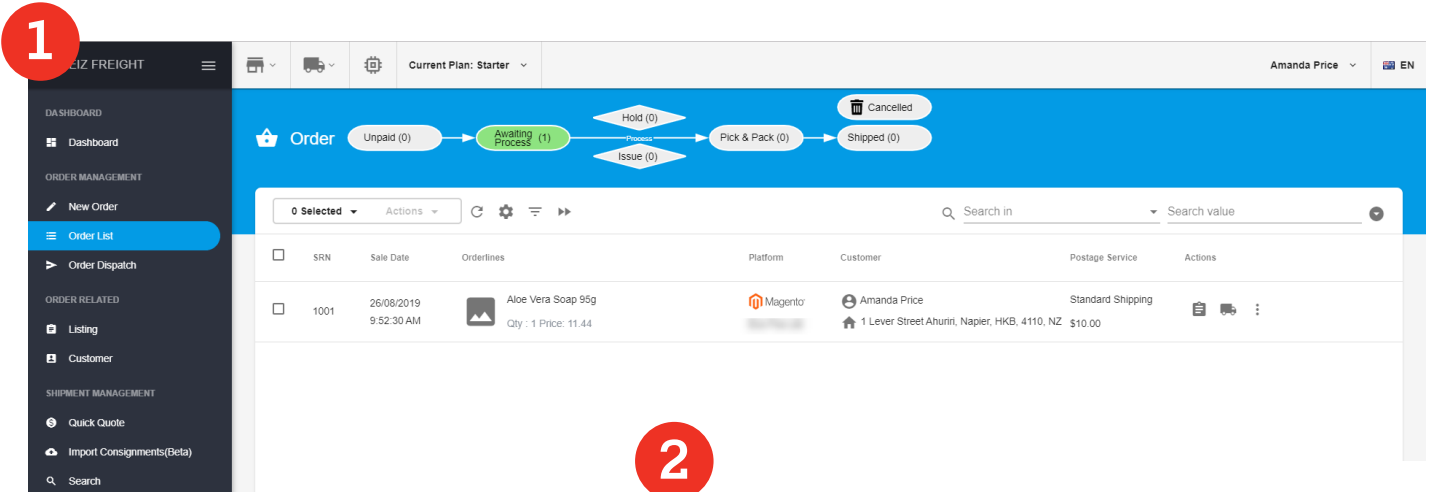

1. Once you've linked Magento to your EIZ account (refer page 5) you can enable the order sync function to pull through your unfulfilled transaction list.
2. To enable the transaction sync, simply enable the slider so that it turns blue. The sync will occur automatically.
3. Your transactions will appear in the Order List as shown (below).

3

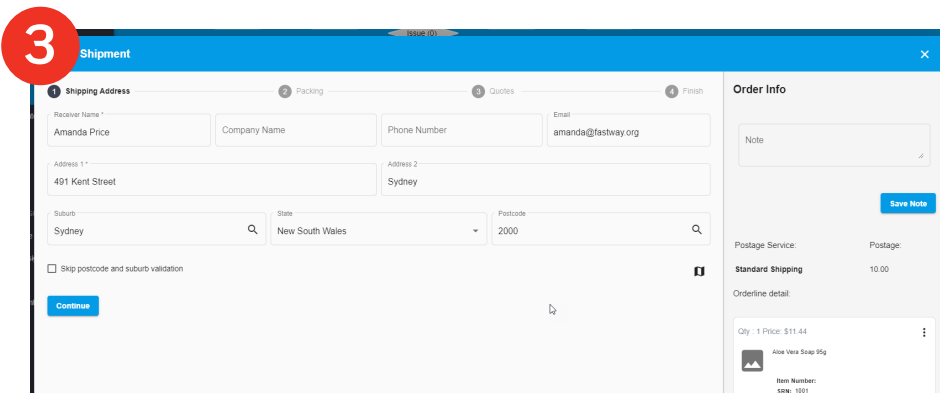

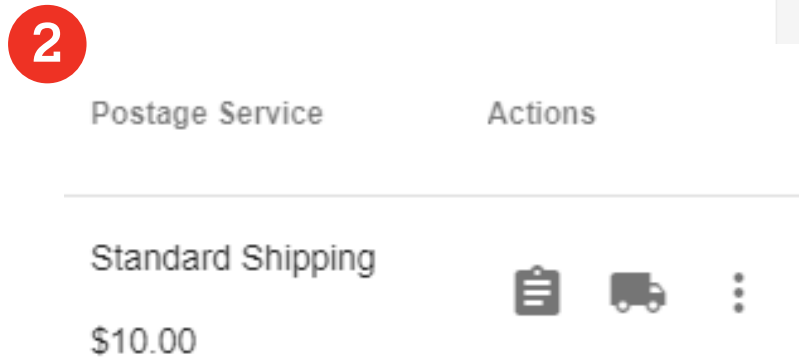

The screenshot shows the 'Order List' page. At the top, there is an order flow diagram: Unpaid (0) -> Awaiting Process (1) -> Hold (0) -> Pick & Pack (0) -> Shipped (0). Below this is a table of orders. The first row is selected and shows an order from Magento for 'Aloe Vera Soap 95g' with a sale date of 26/08/2019. The order is in the 'Awaiting Process' stage. The customer is Amanda Price, located at 1 Lever Street Ahuriri, Napier, HKB, 4110, NZ, with a postage service of Standard Shipping for \$10.00.

Creating labels

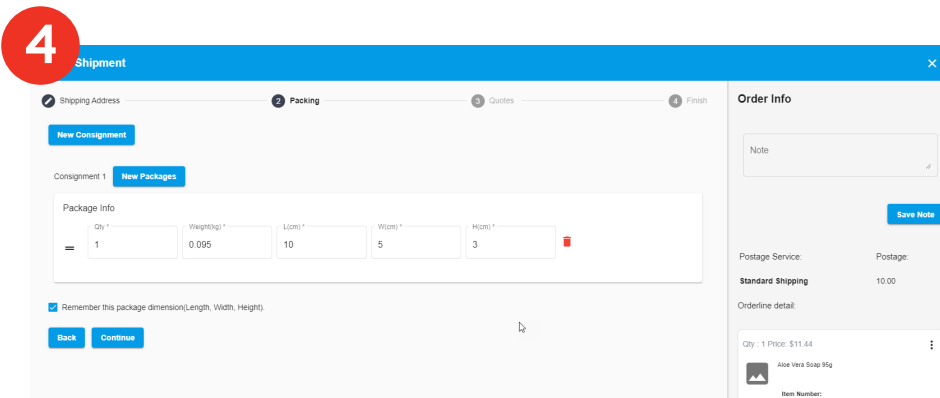

Creating shipment labels in EIZ

1. To create a label for an unfulfilled shipment in the order list, follow the next steps;
2. Click on the van icon on the item line as shown (right)

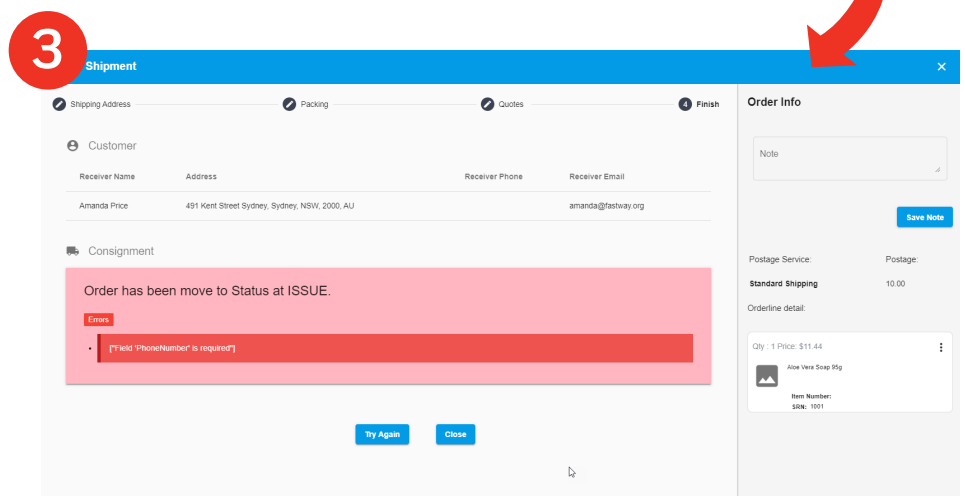

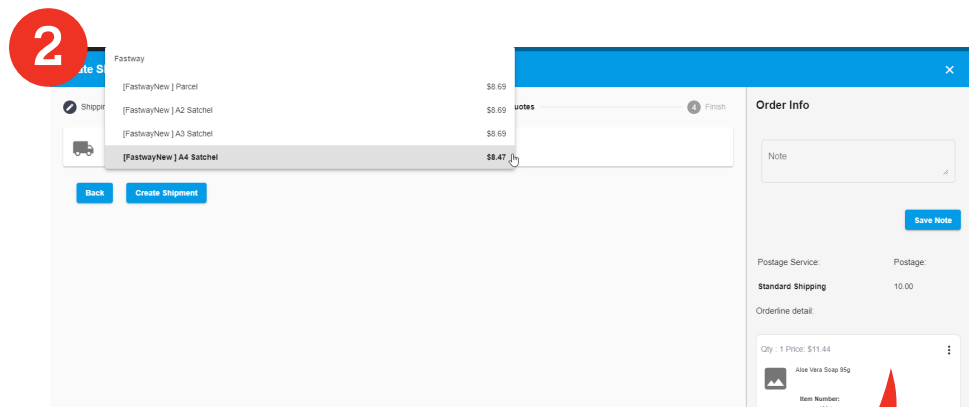

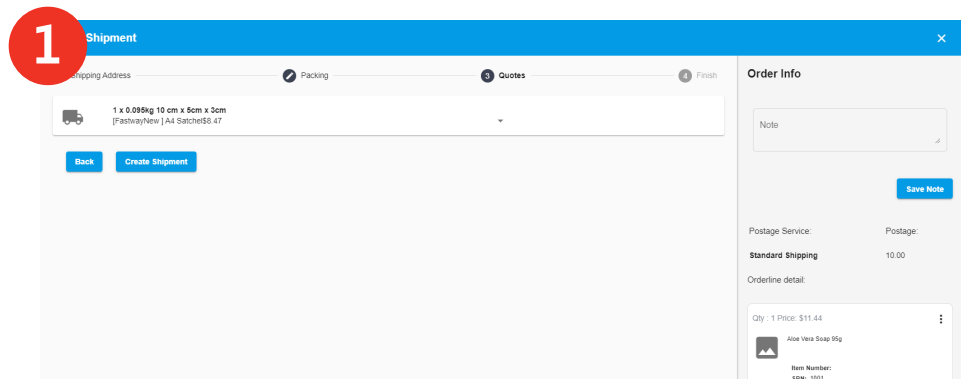

3. Review the shipping details, this should pull through automatically. Ensure that any mandatory fields, including phone number and email address are included. Click 'Continue'.

4. Enter any parcel requirements, including the cubic dimensions of the parcel into the relevant fields.

Your fulfillment orders will continue to sync automatically until this process is disabled

Creating shipment labels in EIZ(cont)

1. The system will automatically allocate the cheapest service for your parcel.
2. To change from a satchel service to a parcel or vice versa use the dropdown box as shown (above) to select a new service and then click 'Create Shipment'.
3. If there are any issues with the consignment or any data that you've entered, the system will prompt you to make changes. Once you have satisfied all the requirements to create a label, move to step 4.

4

The screenshot shows a 'Shipment' window with a progress bar at the top indicating steps: Shipping Address, Packing, Quotes, and Finish. The 'Customer' section lists Amanda Price at 491 Kent Street Sydney, NSW, 2000, AU, with phone +61414705689 and email amanda@fastway.org. The 'Consignment' table shows one item: FastwayNew, 1 x (0.095kg 10 cm x 5cm x 3cm), Tracking Number MS0000341044, Price \$8.47. The 'Order Info' panel on the right includes a 'Note' field, 'Postage Service: Standard Shipping', 'Postage: 10.00', and an 'Orderline detail' for 'Aloe Vera Soap 95g' with a quantity of 1 and price of \$11.44. Buttons for 'Print Label' and 'Close' are at the bottom.

4. Once a label has been successfully created, the system will display the label number allocated and a button to print the label.

5. The label will print in .pdf format and can be sent to any standard printer. An example for this shipment is shown below.
